Open to marketing, communications and programme roles in Singapore. One month's notice. Singapore citizen.

SUMMARY

Programme Executive at Tax Academy of Singapore since March 2026. I run programmes and events, make the videos that promote them, and build the tools that remove manual steps from production. Psychology graduate with a background in marketing, video and client-facing work.

EXPERIENCE

Programme Executive, Tax Academy of Singapore — Mar 2026 - Present

- Since joining: about 10 programmes and events, about 70 videos, about 50 of them made with an AI-assisted editing workflow.
- Plan and coordinate tax programmes and events from preparation through delivery.
- Produce programme marketing across LinkedIn, email campaigns, short-form and horizontal video.
- Shot, directed and edited a three-part mascot travel series with branded motion graphics.
- Built tools that remove manual production steps: motion graphics rendered from code, speech-to-text captions, and a converter that turns HTML designs into editable PowerPoint.

Independent e-commerce and marketing project, My own Shopify store — Dec 2025 - Apr 2026

- Launched a Shopify store with Meta Pixel tracking.
- Ran Meta Ads with CBO and ABO budget strategies and reviewed CPM and CTR.
- Wrote direct-response copy informed by consumer psychology.

Clinic Associate, Intellect — Jun 2024 - Sep 2025

- Managed client enquiries and intake, worked out what each client needed and matched them with a suitable therapist.

Research Assistant, Singapore University of Social Sciences — Oct 2023 - Jul 2024

- Supported neuroimaging data collection, preprocessing and scientific writing, and recruited research participants.

AI AND AUTOMATION PROJECTS

Video and research automation | Python, LLM APIs — 2026

- Video review tool samples frames alongside the transcript so an AI model can critique both the visuals and the speech.
- Research pipeline runs five expert perspectives in parallel, maps where they disagree, then has a separate reviewer check key citations against primary sources.

RoleCall, a job-search app I built for myself | Node.js, LLM APIs — 2026

- Pulls live listings from MyCareersFuture and Adzuna, removes reposts, scores fit, checks resume keywords against each listing and drafts research and cover letters; 96 automated tests.

Longteng Studio, AI workspace | TypeScript, React — 2026

- Routes tasks between AI agents with a review step before results are accepted; its video review room turns timestamped comments into revision tasks.

SKILLS

Marketing	Meta Ads Manager (CBO/ABO, CPM, CTR); Meta Pixel; Google Ads and Google Analytics (certified 2025); Shopify; LinkedIn and email campaigns (EDMs); direct-response copywriting; consumer psychology
Video and content	Shooting, directing and editing; CapCut; short-form and horizontal video; motion graphics rendered from code (HyperFrames); Canva
AI and automation	AI workflows for content, research and video review; Claude and Codex; local models (Ollama); Python automation; APIs; Git

EDUCATION

Bachelor of Science in Psychology, Singapore University of Social Sciences — 2022 - 2025

Coursework includes AI and Marketing, and Psychology of Consumer Behaviour.

Diploma in Civil Engineering and Business, Singapore Polytechnic — 2017 - 2020
